Rivers Under Fire: Climate Stress and Armed Conflict in the Blue Nile Basin

REF: 3BI-RPT-2026-04

WWW.3BISUDAN.ORG

Contents

How hydrological volatility interacts with armed mobilisation across the Blue Nile corridor — and what evidence-led adaptation demands of ceasefire design.

How hydrological volatility interacts with armed mobilisation across the Blue Nile corridor — and what evidence-led adaptation demands of ceasefire design.

Sudan's compounding crises rarely resolve into a single storyline. Replace this placeholder body copy with the full text of the publication.
